

WIS3

WORKSHOP FOR INFORMATION SHARING AND SAFEGUARDING STANDARDS

DECEMBER 5, 2011

BREAK OUT #2

IDENTITY AND ACCESS MANAGEMENT
ACROSS GOVERNMENT

VISTA ROOM

Dave Chesebrough
AFEI

Presentations

Dave Chesebrough AFEI	Moderator
Chris Loudon Protiviti	Attribute Governance and the Backend Attribute Exchange
Rebecca Nielsen Booz Allen Hamilton	Industry Perspective regarding Gaps in Achieving IdAM Across Government
Scott McGrath OASIS	Security Assertion Markup Language (SAML) & XACML
John Ruegg, Los Angeles County Information Systems Advisory Body	Global Federated Identity and Privilege Mgmt (GFIPM) & NIEF

Strategic Vision

- Background:
 - Need a vision of where we want to be in five or ten years so we can ensure tactical actions taken today will help accomplish the end goal
 - Build on existing strategies and guidance
- Near Term Actions:
 - Develop technology independent use cases that describe the desired end state
- Long Term Actions:
 - Build reference architectures that people can test against

Governance

- Background:
 - Defining the framework and governance over multiple aspects of the sharing and safeguarding
 - Coordination between existing governance activities where they exist, create governance where it doesn't
 - Governance should use industry as input to the process and benefit from best practices where ever they exist
- Near Term Actions:
 - Identify existing governance bodies and white space
 - Identify best practices for each specific governance need
 - Develop a common lexicon
- Long Term Actions:
 - Eliminate redundancy

Adoption Strategy

- Background:
 - Need to give “clear” guidance on how to get there from here
 - Policy and procurement support for the desired end state
- Near Term Actions:
 - “Eat your own dog food” Don’t require something and then ignore your own guidance
 - Enforce existing rules on government procurements
 - Enable application to accept federated identities
- Long Term Actions:
 - Develop holistic view of federated identity ecosystem
